

## Test Planner and Tracker

25 Astitva Gupta, Sachin Kumar Danisetty, Trusi

| No. ID | Related Use case    | Pre-conditions   | Test Description (steps)   | Expected Outcome   | Sprint 2 Outcome (color code cell background) | Comments (if test case failed) | Sprint 3 Outcome (color code cell background) | Comments (if test case failed) | Sprint 4 Outcome (color code cell background) | Comments (if test case failed)                         | R1 Outcome (color code cell background) | Comments (if test case failed) | Sprint 5 Outcome (color code cell background) | Comments (if test case failed) | Sprint 6 Outcome (color code cell background) | Comments (if test case failed) | Sprint 7 Outcome (color code cell background) | Comments (if test case failed) | R2 Outcome (color code cell background) | Comments (if test case failed) |
|--------|---------------------|--|--|--|---|--------------------------------|---|--------------------------------|---|--|---|--------------------------------|---|--------------------------------|---|--------------------------------|---|--------------------------------|---|--------------------------------|
| 1      | User Authentication | User has Google account for SSO  | 1. New User clicks the SSO button on home page.<br>2. User enters their details on the SSO host's portal.<br>3. On succesful log in, the host sends a token and the user is added to the database. | User is redirected to their emply search history page.   |   | N/A                            |   |                                |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 2      | User Authentication | User has Google account for SSO  | 1. Existing User clicks the SSO button on home page.<br>2. User enters their details on the SSO host's portal.<br>3. On succesful log in, the host sends a token which is checked in the database. | User is redirected to their search history page.   |   | N/A                            |   |                                |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 3      | Search              | User is logged in.   | 1. User enters the desired attrubutes.<br>2. User clicks the 'Search' button.  | User is redirected to the results page.  |   | N/A                            |   | Feature not implemented yet.   |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 4      | Search              | User is logged in.   | 1. User enters the invalid attrubutes.<br>2. User clicks the 'Search' button.  | User is redirected to the search page, prompted for input.   |   | N/A                            |   | Feature not implemented yet.   |   | Specified domain not available. Exception not handled. |   |                                |   |                                |   |                                |   |                                |   |                                |
| 5      | Logout              | User is logged in.   | 1. User clicks the 'Account' button on navbar.<br>2. User clicks the 'Logout' button.  | User is logged out and redirected to the start page.   |   | N/A                            |   |                                |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 6      | View Search History | User is logged in.   | 1. User clicks the 'Account' button on navbar.<br>2. User clicks the 'Search History' button.  | User is redirected to the history page.  |   | N/A                            |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   |                                |   |                                |   |                                |   |                                |   |                                |
| 7      | View Search History | User is logged in.   | 1. User clicks the 'Account' button on navbar.<br>2. User clicks the 'Search History' button.<br>3. User clicks on a search item.  | User is redirected to the show results page of the selected search item.   |   | N/A                            |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   |                                |   |                                |   |                                |   |                                |   |                                |
| 8      | View Search History | User is logged in.   | 1. User clicks the 'Account' button on navbar.<br>2. User clicks the 'Search History' button.<br>3. User clicks on a 'New Search' button.  | User is redirected to the search page.   |   | N/A                            |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   |                                |   |                                |   |                                |   |                                |   |                                |
| 9      | Profile             | User is logged in.   | 1. User clicks the '<user name>' button.   | User is redirected to their profile page.  |   | N/A                            |   |                                |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 10     | Profile             | User is logged in.   | 1. User clicks the '<user name>' button.<br>2. User clicks 'Search History' button.  | User is redirected to the history page.  |   | N/A                            |   | Feature not implemented yet.   |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 11     | Show Results        | 1. User is logged in.<br>2. User has started a search.                                     |  | The results are displayed to the user.   |   | N/A                            |   |                                |   |  |   |                                |   |                                |   |                                |   |                                |   |                                |
| 12     | Show Results        | 1. User is logged in.<br>2. User has started a search.                                     | 1. User selects one or more 'sort' parameters.   | The results are sorted accordingly and displayed to the user.  |   | N/A                            |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   |                                |   |                                |   |                                |   |                                |
| 13     | Search              | 1. User is not logged in.<br>2. User is on the search page.                                | 1. User enters the desired attrubutes.<br>2. User clicks the 'Search' button.  | Search failed, user not authenticated. User is redirected to welcome page.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Exception not handled.                                 |   |                                |   |                                |   |                                |   |                                |   |                                |
| 14     | Show Results        | 1. User is logged in.<br>2. User has started a search.                                     | 1. User click an entry in the results.   | The selected element displays additional infomation.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   |                                |   |                                |   |                                |   |                                |
| 15     | Startup Profile     | 1. User is logged in.<br>2. User has started a search.<br>3. User is on show results page. | 1. User double clicks an entry in the results.   | User is redirected to startup profile page with information of the corresponding startup.                              |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   |                                |   |                                |
| 16     | Startup Profile     | 1. User is logged in.<br>2. User is on startup profile page.                               | 1. User clicks a social button under startup description   | User is redirected to the corresponding profile page.  |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   |                                | Feature not implemented yet.            |                                |
| 17     | Startup Profile     | 1. User is logged in.<br>2. User is on startup profile page.                               | 1. User clicks a contact.  | User is redirected to the contact's Twitter page.  |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   |                                | Feature not implemented yet.            |                                |
| 18     | Startup Profile     | 1. User is logged in.<br>2. User is on startup profile page.                               | 1. User clicks a Tweet.  | User is redirected to the corresponding Twitter page.  |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   |                                | Feature not implemented yet.            |                                |
| 19     | View Search History | 1. User is not logged in.  | 1. User enters URL of search history page.   | User is redirected to the welcome page.  |   | Feature not implemented yet.   |   | Feature not implemented yet.   |   | Feature not implemented yet.                           |   |                                |   |                                |   |                                |   |                                |   |                                |
